React Unicons

4,500+ Pixel-perfect vector icons as React Components. These icons are designed by [IconScout](#).

Getting Started

You can easily install [react-unicons](#) using npm.

```
npm install --save @iconscout/react-unicons
```

Or using [yarn](#)

```
yarn add @iconscout/react-unicons
```

Usage

Use individual icons

```
import React from 'react';
import UilReact from '@iconscout/react-unicons/icons/uil-react'

const App = () => {
  return <UilReact size="140" color="#61DAFB" />
};

export default App;
```

You can customize icons as below:

```
<Unicons.UilReact size="140" color="#61DAFB" />
```

Usage as full Package

```
import React from 'react';
import * as Unicons from '@iconscout/react-unicons';

const App = () => {
  return <Unicons.UilReact />
};

export default App;
```

Contributing

We will be happy to have community support for Unicons. Feel free to fork and create pull requests. We have given a small roadmap above so that you can help us build these features.

Request icons

Can't find the icon you are looking for? No worries, we will design it for you. And we'll be happy to design them in upcoming weeks.

License

Unicons are Open Source icons and licensed under [IconScout Simple License](#). You're free to use these icons in your personal and commercial project. We would love to see the attribution in your app's **about** screen, but it's not mandatory.
